Kabupaten Bekasi, Jawa Barat

I am a front-end enthusiast interested in the entire front-end spectrum including dynamic user experiences and solving business-related problems and am motivated to continue learning new skills and improving myself.

Experience

PT. Wong Makmur Sejati - South Jakarta

Jan 2025 - Present

Fullstack Engineer

- Built a comprehensive iPad-specific web app tailored to streamline film production workflows that connect actors, location hosts and production houses.
- Collaborated directly with the CEO to translate the business vision into a functional product, defining key features and ensuring alignment with strategic goals.
- Work closely with designers, product team & peer engineers to ensure smooth integration and implemented pixel-perfect UI.
- Enhance and optimize frontend performance for client-heavy operations.
- Handle complex data flows and app states gracefully using relevant libraries
- Maintain code quality through clean architecture structuring and constant peer reviews.
- Contributed to product discussion, reviews and delivery.
- Implemented multi-language localization, media conversion, cross-browser optimization, responsive design, geolocation API, and drag & drop throughout the app.
- Tech stacks: Google Cloud Platform, ReactJS, PostgreSQL, Docker.
- Frontend libraries used: Zustand, dnd-kit, React-Query, Framer Motion, i18n, Firebase.

CV. Bina Delta (AlphaPro Bimbel) - West Java

Oct 2024 - Oct 2025

Fullstack Developer - Freelance

- Designed and implemented a robust Classroom Scheduling System that supports dynamic session assignments for multiple classrooms, mentors, and subjects across weekly and monthly schedules.
- Collaborated closely with stakeholders to gather requirements and implement client-specific business logic, such as semester-specific rules and custom ranking systems.
- Work closely with other peer engineer to translate business needs to code and bring ideas to production.
- Optimize load times and responsiveness of the app to ensure user efficiency.
- Tech stacks used: MongoDB, NextJS v14, MongoDB Atlas, Zustand, React-Query, TypeScript, Vercel, Teamwork.

Nusantara Beta Studio - South Jakarta

Oct 2023 - Nov 2023

Frontend Engineer Freelance

- Collaborate with peers to develop government app UI components.

Nusantara Beta Studio - South Jakarta

Feb 2023 - Jul 2023

Frontend Engineer Intern

- Joined as one of 25 participants to get accepted among 1000+ registrants.
- Took part in creating internal app for Engineering Manager's resource mapping project.
- Solved C-level problems of forecasting employee workloads for project velocity.
- Tech stacks and collaboration tools used: NextJS v12, Typescript, Miro, ClickUp, Gitlab.
